

## **Post Implementation Evaluation Report**

### **Web-based Emergency Response Plan – The Adjutant General’s Department**

Project Dates: 4/2005 through 4/2006

Project Cost: \$455,500

#### Project Objectives

The Kansas Emergency Planning Team objectives were to purchase or develop a web-based planning tool that:

- Met the requirements of federal and state laws and planning standards
- Was easy to use
- Provide the means to systematically enter, compile, review, share and print disaster planning information
- Track historical and hazard assessment data
- Provided a simple, standard format
- Ability to maintain coordinated visibility of the plan using the power and convenience of the internet
- Password protected
- Software could reside on KDEM server if necessary
- The system had to have the capability to grow with emergency management trends and future laws and regulations.
