

## **Post Implementation Evaluation Report**

### **Corrections - KDOC Enterprise Architecture Plan**

Project Dates: 4/2008 through 6/2009

Project Cost: \$480,081

#### Project Objectives:

The original objective set forth and met for the project was to develop an Enterprise Architecture (EA) Plan for the Department of Corrections.

As stated in the original task order: “The goal of the Enterprise Architecture (EA) is to deliver to the KDOC a holistic look at their organization so that they can use an EA basis for System replacement and evolution. The EA should identify business processes that are not consistent across the organization.”

Through the extensive set of business and technology models developed through this effort, and additional associated deliverables, a comprehensive 10-year Strategic Roadmap has been developed, reviewed, and adopted by KDOC.
