

Post Implementation Evaluation Report

Kansas Law Enforcement Reporting System (KLER) - TRCC – Kansas Highway Patrol

Project Dates: 3/2007 through 1/2010

Project Cost: \$535,941

Project Objectives:

Develop an application and associated interfaces to perform the following functions:

- Collect and route information related to traffic incidences to the Kansas Traffic Records System (TRS).
- Collect and route information related to criminal offenses to the Kansas Incident Based Reporting System (KIBRS).
- Collect and route information related to traffic incidences and/or criminal offenses to local repositories (ex., agency records management system).
- Improve timeliness and accuracy of data submitted to the respective repositories.
